**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9 and 21-25, drawn to a muffler system attenuator, classified in class 181.
  - II. Claims 10-20 and 26-30, drawn to geological formation monitoring tool, classified in class 166.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the inventions are distinct. The subcombination has separate utility such as performing acoustic investigations, preventing fluid communications, and receiving acoustic signals.

*Conclusion*
